RE: Prescribed burning at Bull Mtn. trail system

FYI - from the U S Forest Service

We are anticipating, based on weather and historical data, to hopefully start burning towards the end of February and through March

You'll see the prescribed burn signs posted all along the north side of FS-28-1. As soon as they tell me, I'll let everyone know when they'll do the burning. Know that there will only be a day or two notice. You'll definitely want to avoid the area during the burning.
